SCALER School of Technology + Priyansh Saxena

From Notebooks to Production Systems

A Course Closing

Priyansh Saxena

ML System Design and LLMOps
Course Closing / September 2026

From Notebooks to Production Systems

Where we started

- A model that works on your laptop
- "It gets 94% accuracy, ship it"
- No feature store, no registry, no monitoring

Where we are now

- Feature stores, serving layers, MLOps pipelines
- LLM inference at scale, RAG, and agentic systems
- A 10-step framework to design any ML system — and defend it

"You didn't just learn ML system design — you built the judgment to reason about systems that don't exist yet."

Thank You!

It's been a privilege watching you turn theory into systems thinking. **Now go build the systems nobody's written the playbook for yet.**
